## SAFETY & SECURITY

Here at the Quality Inn International, the quality of security and the professionalism of our outstanding staff define the overall experience and value you expect to get at a hotel. This philosophy of "Customer First" is truly OUR philosophy.

Twenty-four (24) hour controlled gate access and patrolling security officers are only the beginning of the security features found within our hotels. Safety and security at the Quality Inn International have a level of priority to which few other hotels in Central Florida can compare. Other features and specially designed measures taken at our properties include:

- Automatically locking oversized deadbolts on each guest room door, a product invented jointly with TESA lock systems
- Electronic card key access for each guest room door
- Credible, vigilant and well-trained security team
- Exterior corridors, allowing quick egress for emergencies, as well as placing each room in an easily observable configuration for safety and security awareness. Exterior corridors are quickly becoming the standard for maximizing the guests safety and security (the Disney Coronado Convention Resort was recently designed based on this concept).
- Video cameras surveillance
- Ample illumination in public areas
- Door peepholes

Our guests' security and protection have a priority at the Quality Inn International that is unparalleled within the industry. Our goal is your safety and peace of mind, so that you may enjoy a worry-free vacation.
